

Rapid 3D Situational Intelligence
Ground + Air Visibility (Integrated with VORTEX)

Drone Security & Inspection System

See Faster. Respond Smarter. Operate with Less Labor.

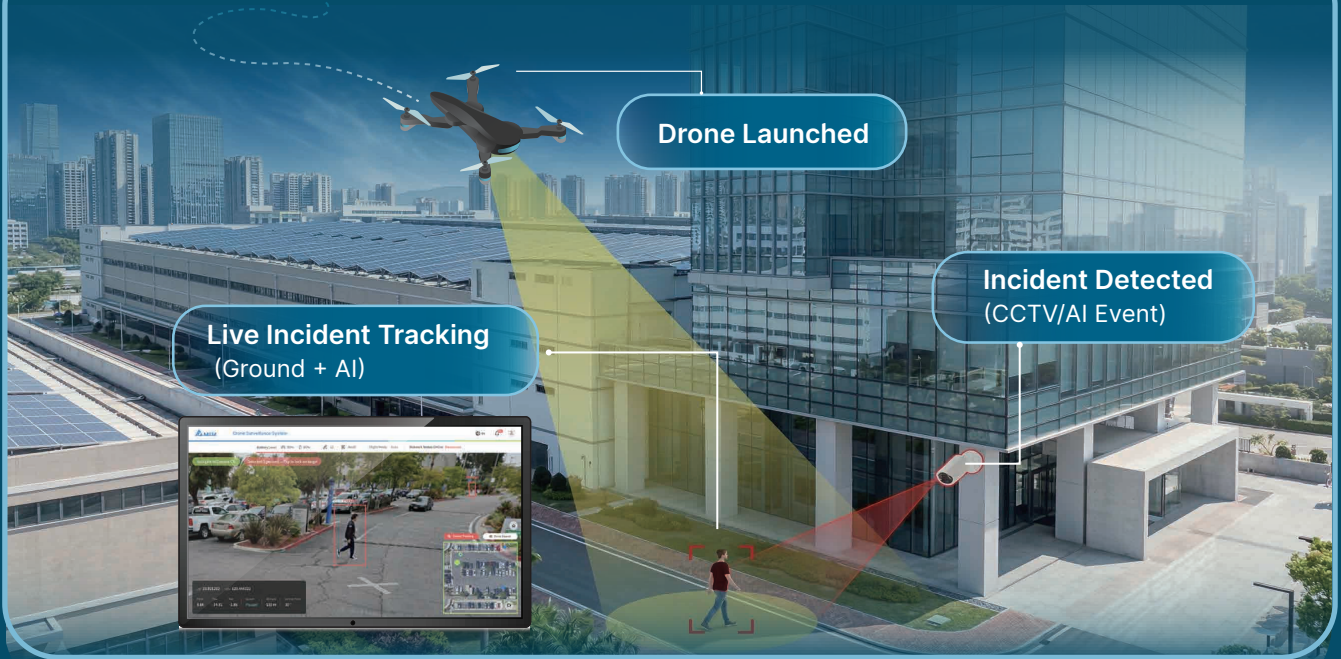

Autonomous Aerial Security & Asset Inspection -
fully integrated with VORTEX.

A 3D security solution that automatically deploys drones to track incidents in real time.

- Unified ground + aerial operations
- Event trigger, automated response
- Live bird's eye view & real-time streaming
- All-condition visibility (RGB + Thermal)
- Active target tracking (people, vehicles, or assets)
- 3D situational awareness

One Platform. Two Mission. Maximum ROI

Security Response + Asset Inspection — Unified

Beyond Security: Operational Intelligence

Infrastructure Inspection

- Scheduled Tasks
- Facades Spalling
- Pipeline Corrosion

Solar Panel Inspection

- Automated Flight Paths
- Anomaly Detection
- Historical Comparison

Bridge Inspection

- AI-Based Analysis
- Automated Measurement
- 3D Visualization

Elevate Security From Reactive to Autonomous

Up to 10x faster incident response

* 5 min (traditional) → 30 sec via drone within 100m range

Reduces on-site manpower

360° visibility with zero blind spots

- ✓ 360° full-view
- ✓ Dynamic tracking
- ✓ No blind spots
