

Red5 Access Control

for Facility Owners and Operators

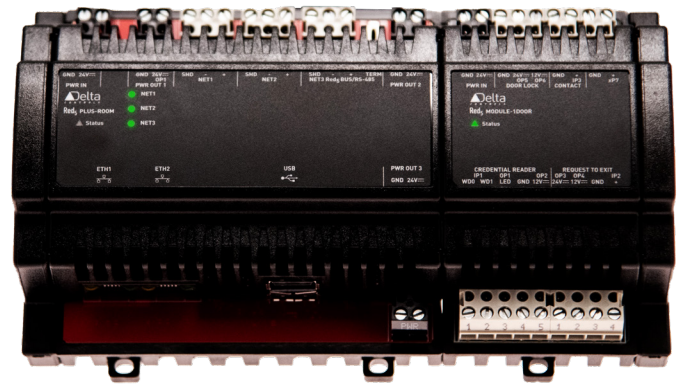

**Simple, Scalable,
Interoperable
Access Control**

Take Control of Safety and Efficiency. Designed with scalability, efficiency, security and flexibility at its core, it's the ideal solution for modern building owners looking to minimize costs and maximize value.

Why Red5 Access?

- **One System, Full Control:** Access, lighting, HVAC, and energy management under one platform.
- **Mobile Credentials:** Support for mobile phones, key-pads, biometric devices, and traditional cards.
- **Emergency Readiness:** Supports lockdown modes and real-time alerts via enteliWEB.
- **Audit & Compliance:** Track access logs and credential activity with enteliWEB dashboards.
- **Privacy for Multi-Tenant Spaces:** Assign and delegate control without sacrificing security.

Benefits

- Real-time monitoring of entry events and door statuses.
- View and revoke credentials instantly.
- Use mobile apps for entry or to manage visitor credentials.
- Data-driven decisions using occupancy and usage trends.
- Fully encrypted communication using BACnet Secure Connect (SC).

Protect What Matters. Control with Confidence.
